DiDonato provided design and construction related services to complete the site and utility work for the redevelopment of the existing NOCO Express gas station located at 1555 North French Road in the Town of Amherst. The new development entails a new gasoline fueling station along with convenience store, a Subway restaurant, and Tim Horton's coffee/bakery shop located inside. The redevelopment is comprised of a new 6,411 SF, single story building and a 3,500 SF covered fueling island canopy.

Prepared designs for the proposed paving, grading, drainage system, sewer system, and the waterline for this project. Also provided SWPPP preparation and inspection.
